

PERSONNEL / PAYROLL INTERFACE WORKAROUND

CPMS CONTROL NUMBER:	01-0007
-----------------------------	---------

ISSUE DATE:	27-Jul-01	PR/DAR NO:	
RESCIND DATE:	8-Apr-2002	REMEDY NO:	2112

<u>PROBLEM :</u>	<u>PERSONNEL</u> <input checked="" type="checkbox"/>	<u>PAYROLL</u> <input type="checkbox"/>
	LEGACY <input type="checkbox"/> MODERN <input checked="" type="checkbox"/>	
	BOTH <input type="checkbox"/>	
<p>PAY500 format is being produced with the locality percentage improperly formatted for employees in the Chicago and St Louis locality pay areas. When the authorized percentage ends in "00" (these locality areas are 13% and 8%) the system is not recognizing the 00 decimal factor. The salary computations in DCPDS are correct and the locality amount flows to payroll correctly. The problem is that DCPS uses the locality percentage when determining overtime rate and for application of pay caps.</p>		

<u>WORKAROUND:</u>	<u>PERSONNEL</u> <input checked="" type="checkbox"/>	<u>PAYROLL</u> <input type="checkbox"/>
<p>Payroll interface transactions written for affected employees require regeneration with modification to the locality percentage. Remember that this regeneration must be accomplished by users with US Fed HR Manager responsibilities to allow for modification of the erroneous values. Regeneration is NOT required for TSP for FEHB or AWARD transactions, but must be done for all other NOAs including non-numeric NOAs that impact the P or T Sup at DCPS.</p> <p>This workaround was erroneously identified on the Workaround Control Log. Sorry for the very late rescind.</p>
